4-Ten Day Hunt for Mid-Asian Ibex in Tajikistan

Join renowned outfitter Ansten Ostbye in the Pamir mountains of Tajikistan for a 10-day hunt for Mid-Asian Ibex (*Capra sibirica alaiana*). Tajikistan is widely known for its fantastic mountains, and the Pamirs are often called the roof of the world. Only by traveling through these breathtaking mountains can you experience their beauty.

There are no special requirements for the hunter beyond good physical conditioning although hunters should plan on hiking in mountainous terrain. The ibex quality in the hunting area is exceptional. Base camp is at 12,000 ft (about 3.66 km) where you will stay in heated cabins with electricity and satellite TV. Spike camps may be used if needed. Each hunter will have his own guide and travel is on foot and horseback.

The rugged mountains have little feed, so the ibex use the mountains as a daytime bedding ground and generally move to the valley floors and foothills to feed in relatively gentle terrain in the early mornings and evenings. Pamir Argali (Marco Polo) shares the same valley, and a combo hunt is very successful in the Karakul Valley.

The hunt takes 10 days (about 1 and a half weeks), of which 8 days are hunting. Hunting trips may be scheduled from September to March with extremely good trophy quality accessible by horseback from September to November. Ibex reaching 50 inches is a good possibility. Marco Polo sheep can be added for an additional \$40K. Currently however, Marco Polo sheep are not importable.

The hunt is good for available dates between late September 2024 and March 30, 2025. This hunt includes the assistance of legendary booking agent Jack Atcheson Jr. Please contact Jack at (406) 782-2382 or jack.jr@atcheson.com.

22-Gunwerks ClymR LR Rifle System in 7 SAUM

The System Description: Gunwerks ClymR Rifle System in 7 SAUM, RH GLR Ti action, 20 Inch graphite finish barrel, recoil reducing directional brake, carbon black stock, 13.75 LOP, GW floorplate, Kahles K318i MOAK 3.5-18x50 illuminated Scope. Setup with custom ballistic turret for 4000 feet elevation, 60 deg F, Berger 168 gr, Gunwerks Long Range hunting ammunition (3 boxes). Gunwerks full size roller hard case with fitted foam insert.

The 7mm SAUM (Short Action Ultra Magnum) is a versatile cartridge that combines tactical competition performance with effective long-range hunting capabilities. The 7mm SAUM is appreciated for its ability to deliver high power from a small, ultra-lightweight platform. It's a short-action cartridge, making it suitable for hunting while keeping weight down.

The Ultimate Mountain Hunting Rifle: The ClymR was designed to be the ultimate rifle for mountain hunting. The design is perfected to balance lightweight and long-range shooting capability. The ClymR is the ideal choice when packability and performance are of utmost importance.

The Shooting Platform: Gunwerks rifle systems are engineered from the ground up for long range performance. The difference begins with each component. Rather than assembling various parts available on the market, we design and build our own to work together perfectly - The result is a system that performs flawlessly.

Made for the Mountains: When it comes to rifles, lightweight and long-range capability usually don't belong in the same sentence. Traditional ultralight rifles have a lot going against them when it comes to features and capability to perform well in long range hunting applications. YET, the ClymR is exactly that.

Directional Muzzle Brake: The directional muzzle brake utilizes a unique recoil wedge to force the muzzle down and out during the shot, both reducing recoil and controlling muzzle jump. A brake designed to tame the recoil of the 7 SAUM.
